

# Merrick's Aquamix Tablets™

*Protects and Stabilizes Poultry Vaccines*

## **Convenient ~ Effervescent ~ Pre-Measured Delivery System**

Merrick's Aquamix is formulated to stabilize poultry vaccines administered in drinking water tanks or through in-line medicators. Aquamix is a unique blend of highly soluble ingredients that neutralize chlorine and other water quality factors, increasing vaccine viability.

### **Indicator Dye**

Aquamix contains a granular water-soluble food grade blue dye to temporarily stain the beaks, tongues and feathers of the birds. This dye helps caretakers monitor birds for vaccine consumption and to monitor the presence of the vaccine solution in the waters.

### **Effervescent Activity**

Aquamix tablets have an effervescent activity when added to water. This bubbling action helps disperse the product in the solution and reduces the need for mixing.

### **Convenient Delivery System**

Aquamix tablets also eliminate the need to measure and pour vaccine stabilizers.

### **Ingredients**

Sodium Bicarbonate, Milk Protein Products, Citric Acid, Polyethylene Glycol, Sodium Croscarmellose, Artificial Coloring (FD & C Blue #1)

### **Use Instructions**

1 tablet per 100 litres  
(26.5 US gallons) of water.

## **Beneficial Protection ~**

Headlines have been dominated recently, as in the example below, by reports of the increasing spread of the H5N1 virus across the world. The development of vaccines that can be delivered through water supplies is a potent weapon against this deadly virus. Using Aquamix in conjunction with these vaccines will help to protect the efficacy of these vaccines in the field.

**News Flash!**

## **China To Produce 1 Billion Doses Of Bird-Flu Vaccine For Animals**

*Source: Dow Jones (26/12/2005)*

**Beijing - December 26, 2005.** China plans to produce 1 billion doses of a new bird flu vaccine for animals that is designed to make an effort to inoculate the country's billions of farm birds faster and cheaper, state media reported Monday.

*The vaccine can be injected, given as nasal spray or as eye drops, or put into water supplies, and immunizes birds against bird flu and Newcastle disease, the China Daily newspaper reported.*

**Product of the U.S.A.**

### **Packaging**

# 40906644 50 Tablets per Jar  
#40906639 6 Jars per Case (300 Tablets)

**Store in a Cool Dry Place**
