## SELECT 100<sup>™</sup>

### The 100% Fat Product For Use In Swine Rations

#### Why Add Fat?

Fat fortified diets have been shown to provide many benefits for sows and baby pigs. Whether added before farrowing or during growth, SELECT 100 provides extra energy. Additional energy not only helps increase a baby pig's chances for survival, but adds palatable nutrition to the pre-farrowing and lactation diets of sows.

During late gestation and lactation, increased fat levels in colostrum and milk significantly improve survival rates of baby pigs. Many sows, especially first litter gilts, do not consume enough energy during lactation to maximize milk production and maintain body weight. Weight loss during lactation is a major cause of sows failing to recycle. Adding SELECT 100 to the lactation diet will result in sows consuming more energy while decreasing the interval between weaning and rebreeding. Added fat helps sows recycle faster.

#### Advantages

As pigs grow, fat fortified rations continue to provide improved feed efficiency, increased palatability, and nutritional action. These are important advantages that work toward improved swine health and productivity.

#### Feed Efficiency

Studies have shown that fat also aids in appetite control. Lactating sows on added fat diets will consume less feed, since they eat to satisfy their energy needs. SELECT 100 improves feed efficiency for growing pigs too.

#### Convenient

Solid forms of fat must be melted before they are added to rations and liquid fat can stick to mix and grind equipment. The small size and dry form make SELECT 100 easy to handle and mix.

#### SELECT 100 Benefits

- Improves feed efficiency.
- Increases palatability of feed.

##### *For Sows:*

- More pigs born alive.
- Bigger and stronger pigs at farrowing.
- Better milking sows.
- More blood sugar available to baby pigs.
- Sows recycle faster.

##### *For Baby Pigs:*

- Improved survival rates.
- Builds energy stores in developing pigs.
- Better feed conversion.
- Faster weight gains.

#### Guaranteed Analysis

Crude Fat ..... Minimum.....99.5%  
Moisture ..... Maximum.....0.5%

Metab. Energy - Swine: 8301 Kcal/kg  
3766 Kcal/lb

#### Ingredients

Hydrogenated Animal Fat (Beef and Pork)  
preserved with BHA.

##### **Packaging:**

Packaged in 50 lb (22.67 kg) easy-open bags, with separate heat-sealed poly liners for moisture protection.

##### **Product No.**

43992602

50 lb (22.67 kg) Bags

## Feeding Directions

### SOWS

SELECT 100 Gestation Diet

Top dress 1#  
SELECT 100/sow/day for 14 days  
prior to parturition.

SELECT 100 Lactation Diet

Top dress 1/2# to 1#  
SELECT 100/sow/day during  
lactation (depending on  
sow condition).

or

Add 75# SELECT 100/ton  
to your present gestation  
or lactation diet.

### Top Dress

<u>SELECT 100</u>	<u>% of Added Fat*</u>
1.25#	10.40
1.00#	8.30
0.75#	6.25
0.50#	4.20

\*Based on 12 lbs total feed  
per sow per day.

### Grind & Mix for Sows & Piglets

<u>Lbs of SELECT 100 Per Ton</u>	<u>% of Added Fat</u>
100#	5.00
75#	3.75
50#	2.50

Blend SELECT 100 as last ingredient in the ration.
