

**TYPE B
MEDICATED
FEED**

**SUPER
GUARD™**
with
VITAMINS

The effective management tool for calf raisers.

Features & Benefits

A calf's early life is critical to proper development. It's also the period of greatest stress. Scours is a common, costly, and complex problem. Calves are prime candidates for disease problems, particularly scours. Merrick's **SUPER GUARD** is an effective herd health management tool to aid in the prevention and treatment of bacterial enteritis (scours).

Research shows that high levels of Vitamin E are especially beneficial during periods of stress. **SUPER GUARD** provides extra vitamins and minerals to help rebuild body stores. **SUPER GUARD** also contains supplemental electrolytes.

The antibiotic combination of Oxytetracycline and Neomycin in **SUPER GUARD** aids in the prevention and treatment of bacterial enteritis (scours). Oxytetracycline is absorbed into the bloodstream as well as being active within the intestinal tract. Neomycin is primarily effective against intestinal bacteria.

PACKAGING: Available in 3 lb and 25 lb pails. 3 lb pails are packed 4 to a carton.

WARNING: Withdraw feed 30 days prior to slaughter. A withdrawal period has not been established for this product in preruminating calves. Do not use in calves to be processed for veal.

MEDICATED

ACTIVE DRUG INGREDIENTS

Oxytetracycline 3.33 g/lb
Neomycin Base 6.67 g/lb

GUARANTEED ANALYSIS

Crude Protein, minimum 7.00%
Crude Fat, minimum 0.50%
Crude Fiber, maximum 0.15%
Calcium, minimum 0.45%
Calcium, maximum 0.95%
Phosphorus, minimum 0.60%
Vitamin A, minimum 800,000 IU/lb
Vitamin D3, minimum 200,000 IU/lb
Vitamin E, minimum 800 IU/lb

INGREDIENTS

Dried Whey, Kaolin, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Thiamine Mononitrate, Ascorbic Acid, Biotin, Riboflavin, d-Calcium Pantothenate, Niacin Supplement, Choline Chloride, Menadione Sodium Bisulfite Complex (source of Vitamin K Activity), Folic Acid, Pyridoxine Hydrochloride, Magnesium Sulfate, Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Cobalt Sulfate, Iron Sulfate, Selenium Yeast, Calcium Iodate, Mineral Oil, Glucose, Maltodextrin, Sodium Citrate, Sodium Chloride, Glycine, Potassium Chloride, Calcium Lactate, Ascorbic Acid, Inulin, Monosodium Glutamate, Sodium Aluminosilicate, Dried Bacillus subtilis fermentation product, Dried Lactobacillus acidophilus fermentation product, Dried Lactobacillus lactis fermentation product, Dried Lactobacillus casei fermentation product, Dried Streptococcus diacetylactis fermentation product, Dried Bifidobacterium bifidum fermentation product, Artificial Coloring (FD & C Red No. 40), and Natural and Artificial Flavors.

MIXING & FEEDING DIRECTIONS

Follow label instructions carefully.
This feed must be diluted as indicated in the mixing directions.

PREVENTION: *As an aid in the prevention of bacterial calf enteritis:*

Mix **SUPER GUARD** at the rate of ½ ounce (½ scoop*) per gallon of reconstituted milk replacer or whole milk. For larger quantities, mix 3 pounds (48 ounces) of **SUPER GUARD** per 100 pounds of nonmedicated milk replacer powder to make a Type C medicated feed.

Feed 2 quarts of reconstituted milk replacer or whole milk TWICE A DAY to provide 100 milligrams of oxytetracycline and 200 milligrams of neomycin per day.

TREATMENT: *As an aid in the treatment of bacterial calf enteritis:*

Mix **SUPER GUARD** at the rate of 1 ounce (1 scoop*) per gallon of reconstituted milk replacer or whole milk. For larger quantities, mix 3 pounds (48 ounces) of **SUPER GUARD** per 50 pounds of nonmedicated milk replacer powder to make a Type C medicated feed.

Feed 2 quarts of reconstituted milk replacer or whole milk TWICE A DAY to provide 200 milligrams of oxytetracycline and 400 milligrams of neomycin per day.

**Dry powder should be weighed to determine recommended amount.
Scoop in each pail holds approximately 1 oz dry weight.*

To most effectively prevent and treat calf scours, it is important to consult your veterinarian to accurately diagnose the calf's condition. In addition, good management practices will help to control this complex problem.
